Ingalls Interventional Radiology Team

Perry Gilbert, M.D.
Medical Director

Thomas Aquisto, M.D.

Kevin Keele, M.D.

Richard Lichtenberg, M.D.

Interventional radiologists at Ingalls are board-certified physicians who specialize in minimally invasive, targeted treatments. We combine in-depth knowledge of the least invasive treatments available with diagnostic and clinical experience across all specialties.

As the inventors of angioplasty and the catheter-delivered stent, interventional radiologists pioneered minimally invasive modern medicine. Today, many conditions that once required surgery can be treated non-surgically by interventional radiologists, resulting in less risk, pain and recovery time.

► Minimally Invasive Endovascular Specialists

The IR team at Ingalls is your primary source for expertise in peripheral angiography, angioplasty and stenting. We work closely with vascular surgeons to provide the most advanced, least invasive care for patients with peripheral vascular disease. In fact, interventional radiology treatment is the first-line standard for PAD, even in cases of severe critical limb ischemia and gangrene, because it preserves future treatment options such as surgical by-pass.

► Vascular Disease Experts

Interventional radiology is a recognized medical specialty and involves board certification in Vascular and Interventional Radiology, as well as Diagnostic Radiology.

► Authorities on Radiation Safety

Patient safety is always our first concern. In fact, our interventional radiology and diagnostic radiology training programs include radiation safety, radiation physics, the biological effects of radiation and injury prevention.

► Valuable Second Opinions

Patients considering treatment for peripheral vascular disease should consider a second opinion from one of our interventional radiologists. Call **708.915.5614** to set up a consultation with one of our vascular specialists.

► Team Approach to Care

Our team includes Diane Smith, an experienced Advanced Nurse Practitioner who has extensive expertise in evaluating patients with vascular disease along with our interventional radiologists. Vascular surgeons are also brought into the decision process, and patients are triaged to either surgical or percutaneous endovascular intervention. When possible, diagnostic tests and therapeutic procedures are performed on an outpatient basis.

Using the latest proven techniques, interventional radiologists at Ingalls strive to achieve optimal patient outcomes and provide prompt, personalized care. ■

MEET THE INGALLS INTERVENTIONAL RADIOLOGY TEAM

Our staff includes five special procedure technologists, four interventional nurses and two clerks who strive to provide prompt, caring services for your patients.

Perry Gilbert, M.D.

Perry Gilbert, M.D., is medical director of radiology for Ingalls Health System. He received his medical degree from Northwestern University Medical School in Chicago. Dr. Gilbert performed his internship at Children's Memorial Hospital and his residency at Northwestern University Medical School, where he served as chief resident. Dr. Gilbert also performed a fellowship in vascular and interventional radiology and cross-sectional imaging at Northwestern. He is certified by the American Board of Radiology, with a certificate of added qualification in vascular and interventional radiology.

Thomas Aquisto, M.D.

Thomas Aquisto, M.D., received his medical degree from Wayne State University School of Medicine in Detroit, Michigan. He performed his internship in internal medicine and residency in diagnostic radiology at Emory University School of Medicine, where he served as chief resident. He also performed a fellowship in vascular and interventional radiology at Northwestern University School of Medicine in Chicago. Dr. Aquisto is certified by the American Board of Radiology, with a certificate of added qualification in vascular and interventional radiology.

Kevin Keele, M.D.

Kevin Keele, M.D., received his medical degree from the University of Wisconsin, Madison. He performed a surgical internship at St. Joseph's Hospital in Chicago; a residency in diagnostic radiology at the University of Illinois, Chicago, where he served as chief resident; and a fellowship in interventional radiology at Northwestern Memorial Hospital. Dr. Keele is certified by the American Board of Radiology, with a certificate of added qualification in vascular and interventional radiology.

Richard Lichtenberg, M.D.

Richard Lichtenberg, M.D., received his medical degree from the University of Illinois. He completed an internship at Louis Weiss Memorial Hospital in Chicago and a residency in diagnostic radiology at University of Illinois Hospital, Chicago. Dr. Lichtenberg also performed a fellowship in neuroradiology at Northwestern Memorial Hospital, Chicago, and a fellowship in interventional radiology at the University of Illinois, St. Francis Medical Center in Peoria, and Rush University Medical Center in Chicago. Dr. Lichtenberg is certified by the American Board of Radiology, with certificates of added qualification in neuroradiology and vascular and interventional radiology.
